Oklahoma's building on the plateau of states occupies an avantageous position between the New York and Colorado state buildings. The cornerstone was laid with appropriate ceremonies during the dedication ceremonies of the exposition on May 2. Governor Ferguson and his staff and many prominent citizens from Oklahoma participated.

The building is 72 feet square and wo stories high. It is a combination of the Spanish and Moorish architecture. The main entrance on the south is reached by passing beneath seven arches supported by six pillars of granite and marble quarried in Oklahoma. A flight of broad granite steps eads up to a porch, the entire length of the building and fifteen feet deep. The porch on the second floor is of the same size, but is more enclosed. The building is of wood, the exterior and nterior walls being plastered with Okshows cement. The roof is of red tile and in front the expanse is relieved with an attic feature. The interior is richly finished in the natural woods of the territory, highly polished. The house will contain reception rooms and rooms for the governor and for members of the commission.

In the Palace of Agriculture typical Oklahoma barn will be constructed entirely of grasses grown in the territory. The grasses will be pressed into bales the size of blocks of tones from which the best barns in the territory are built. The roof will be thatched with the various grains and alfalfs. for the fair of '03. Broncho John's Wild West is acknowledged to be the best show of its kind on the road and always draws large crowds. The attraction consists of fourteen head of horses trained especially for the business, ten acting people, besides common help, one overland Concord stage coach, one mountain howitzer, one prairie battery, Winchester carbine '93 model, 44 caliber rifles, 44 callbar revolvers, all ammunition for sham battles, a very picturesque camp in track field, the coach, the ponies saddled, and on the picket line, the boys in their costumes and flag flying, making a grand prairie picture long to be remembered. Everything is genuine. The first act is a sham battle; it fills the grand stand and cheers the people. All of the work is done with old-time life and skill, and, all in all, it is an

exhibition of real life, genuine and American. Everybody will want to see Broncho John's great show; it is well worth a long trip and the price of admission to the fair. feature of the display. This peculiar grain partakes of the characteristics of both wheat and corn and in a measure lish intelligently. can take the place of either or both It grows four and six feet tall and in the field looks not unlike corn. The grain is in a cluster at the top where the core tassel grows. It is round and white, a triffe larger than the ordinary grain of wheat. Kaihr corn makes a sp'endid feed for stock. Toreshed, the grain is an ideal food for poultry, and made into flour, it can be baked into Startling facts will be revealed in Oklahoma's exhibit in the Horticulture Palace. Lemons, pineapples and banames will be features. Of course, these

do not grow out in the open all the year round, but the fruit shown never will have seen the interior of a hot house. The plants are grown in tubs and for about three months in the year are moved indoors. Lemons tha weigh 15 ounces have been produced this way in Oklahoma and they will be shown at the world's fair.

Watermelons grow there to enor mous size. They frequently weigh 100 pounds. All of the usual fruits will horticulture display every day from the time the exposition opens, on April 30, until the close, December 1, 1904 Strawberries are in their prime May 1 and peaches are in season up to Dedawberries, raspberries, cherries plums, apricots, pears, apples, cante-

oupes, etc., have their season. In the mineral department Oklahoma ias some interesting things to show. Plaster cement and plaster of paris are found in rich deposits in many parts of the territory. Many thousands of acres of land are covered with salt in the northwestern part of the territory At certain seasons of the year Salt Creek, which is fed by a chain of when the Spanish war broke out, enclisted in the Twenty-third Infantry and was sent to Manila. a Beneficial Effect On the Health and Happiness of Uncle Sam's Subjects

NEW YORK, September 16.-A law went into operation on the first of July, which, if honestly administered will have a more beneficial effect on the health and happiness of our people than any other law that has been enseted by the wise Solons since the corner-stone of the republic was laid. The law is intended to protect our people from the evil adulterations found in articles of human food, so that if a man orders and pays for bread you must not give him a stone. A stone might be a very healthful introduction to our menu if we only knew how to use it. We have clay eaters in West Virginia whose forefathers and foremothers have lived and thrived on this kind of fodder. It was both filling and satisfying, and in lands where this excellent grub was found in abundance you never heard of famine-the reason of this was that the people were thrifty and shifty and always gave bard work a wide berth. They never gave their frail bodies to unnecessary toil. Whenever they were hungry they always found plenty of

the law, they are authorized to break through doors and windows, thus annulling that staunch old English roverb, "An Englishman's house is nis castle." It is not at all a pleasant thing to know that all the fine packages put up by various companies, so beautiful to look at and backed by the highest medical endorsements, are frauds and nothing but frauds from turret to foundation. We begin with a baby's a course in the Girls' Latin school. bottle, which is recommended as the fountain of life instead of the natural fountain of our grandmothers and great grandmothers, on which we lanted the pillars of long life and health. The substitutes which are placed upon the market for condensed milk, which are embalmed to give them preservation after death, will never be taken as a substitute for the ood old "Muley Cow," which was the dream of our childhood. A casual look around would answer no, yet this honest milkman had a rubber bag full ci water all around his body, reaching to his shoulders, with a nice little rubber pipe reaching down the sleeve of his the toboggan slide at Lakemont park, shirt, and this ingenious and nonest device gave the servant one-half milk and one-half water: I only wish that some other subjects were equally

healthful and free from danger. The strongest attack made by th committee in the adulteration of food was on the drug stores, of which there are several thousand which they found to be perfect Lagerettes of sin. Many of them were nothing better than dram shops. Adulterated gin, brandy, whisky, were bad enough. It was here the old toper came down in the morning to get his eye-opener under the belief that in the drug store he would get nothing but pure stuff. You might call this bottle California Port wine and another, by the addition of a cock reach or two, was labeled Sherry; brandy was a myth and good Old Rye whisky a libel: but the most destruct ive compound, the cap sheaf of refined villainy, was kept in a bottle not as big as your little finger, innocent to look at, yet, in its hidden beauty and comfort, it carries the heaviest curse that the Almighty ever inflicted upon the children of men. Its name is mor-Surany, lot in Broad Top township; phine. It has carried more misery into families, little and great, rich and poor, than any other destructive compound grown by nature and utilized by man since time began. Before me lies the journal of the

THE CENESEE PUME FOOD CO, LE ROY, N. Y. International S S Lesson For September 20 ABSTINENCE FROM EVIL 1 Peter 4 1
11 (A Temperance Lesson)
GOLDEY TEXT—"Benot drunk with wine,
wherein is excess" Eph 5 18

Peter, an apostle of Jesus Christ, the chosen people who are scattered abroad May God bless you more and more and give you still greater peace

most of them are talking only to fool Brace up your minds and exercise the strictest self-control and fix your hopes on the blessings that are coming for you at the appearing of Jesus Christ Be like obedient children do not let the transcontinental railroads of the your lives be shaped by the passions country, and really do not want any which once swaved you in the days of your ignerance, but in your whole life route and in consequence there has show yourselves to be holy, after the pattern of the Holy One from Whom you received your call

Dear friends, I urge you as pilgrims and strangers upon earth, to refram from indulging the cravings of your loot for themselves and their political earthly nature for they make war upon the soul

The Republican leaders pretend to Those of you who are domestic ser oe unanimous for the nomination of vants should always be submissive and R osevelt, yet more than half of them respectful to their masters, not only are opposed to him The cohesive o those who are good and considerpower of public plunder holds them ate, but also to those who are unfair together, but long headed men like For it is a beautiful thing when, as a Root and Quay know that the end is matter of conscience before God a man near and are leaving the rat infested who is suffering unjustly bears his ship There is a universal unrest, troubles patiently and even the chief of the prophets, if Why, it was to this that you were en the flesh, could not predict what the

called For Christ, too, suffered-suffered on your behalf—and left you an example, so that you should follow in His steps So, again, you married women should

submit to your husbands in order that f a man rejects the message, he may, without a word being said, be won over through the conduct of his wife by watching her submissive and blame ess conduct Again, you married men should live

in the proper relation with your wives, showing consideration for a woman's sex, as weaker than your own and not forgetting that you share with them in the gift of Life Then you will be able to pray without hindrance

Lastly, you should all be united sympathetic, full of brotherly love, ind hearted and humble minded You should never return evil for evil, or abuse for abuse, but always a bless ng instead It was for this that you received your call—to obtain a blessing! Since then, Christ suffered in our earthly nature, arm yourself with the same resolve as He did Those who suffer through their earthly nature have done with sins and so will h ve the rest of their earthly lives guided, not by man's desires, but by the will of God Surely you have spent enough time in the past, living as the heathen delight to live For your path has lain among scenes of debauchery, licantiousness, drunkenguarantee of a well known business man to ness, revelry hard drinking and wicked idolatry In these things people are astonished at your not running to the extremes of profigacy as they do, and they abuse you for it But hey will have to answer for their con-

both the living and the dead However, the end of every thing is near Therefore exercise selfrestraint and watchfulness, to help you to pray Above all things, let your love for one another be very earn est for love throws a veil over count less sins Never grudge hospitality to another Use in mutual service such gifts as you have each received, dis pensing faithfully God's many sided

generosity

In the last analysis nobody knows, out we do know that it is under strict Abuse that law even slightly, pain results Irregular living means de angement of the organs, resulting in Constinution, Headache or Liver trouble Dr King's New Life Pills quickly read usts this It's gentle, yet thorough Only 25c at J R Ilvine & Cos Drug

The Best Bargain on Record Probably never in the history of the world was a better bargain made that the purchase of the island of Grenada in the British West Indies It was cought by the French from the Caribs by a solemn treaty in the middle of the seventeenth century, and the price paid was two bottles of rum Esay's mess of pottage was a good stroke of business by comparison. The Caribe soon regretted having sold their birth right and value tried to get the island back by force It is now one of England's most prosperous colonies in the West Indies, with a population of over 50,000 and a big trade

of man has for long ages past been put to vigorous use it is not surprising that the ne d to exercise it should expres its it a 14 weeful instinct. This in struct manifests uself in many and curious ways During the early months of life the natural function of feeding at the breast provides the infants ful excicise. This bottle feeding fails to do and we frequently find bottle fed children seeking to satisfy the natural instinct by sucking their thumbs, fin gers or any convenient object at hand

Curious Ways

The teeth are a provision for biting hard foods but even before they actu ally appear we find the child seeking o exercise his toothless gums on any hard substance he can by hold of and there can be no doubt that exercise of this kind tends to facilitate the erup tion of the teeth a truth indeed recog nized universally whether by the prim ltive mother who strings the tooth of some wild runnal round the neck of her infant or the up to date parent who provides bu child with a bejewel ed ivoly of cord blubbe.
When the teeth have erupted, the mistlentory instruct finds among primi

tive peoples abundant satisfaction in

the chewing of the coarse hard foods which constitute their dietary, but

among us moderns subsisting as we

do mainly on soft foods affording but

little exercise for the misticatory ap paratus it does not find its proper ex pression and thus tends to die out Nevertheless it dies a hard death and long continues to assert itself Witness the tendency of children to bite their pencils and penholders. I have known a child to graw through a bone penholder mu h in the same way as carnivorous animal gnaws at a bone This instinct to chew for chewing's eake manifests itself all over the world In our own country not only do children bite pencils and penholders, but they will thew small pieces of indi rubber for hours together The practies of gum chewing so common among our American cousing evidently come down from faroft times for the primi tive Australians chew several kinds of gum attributing to them nutrien qualities and the Pringonians are sai

Then lon Will Be in to Danger of

Catching Smallpox. I attuce is an absolute preventive of small ox No one is in the least par ticle of danger of catching smallpox who eats a little lettue every day Smallwox belongs to the corbution class of diseases. Salles at sea deprived of fresh vegetal les get sourvy Scurry is a tyrical scoroutic disease Smallpox is another Smallpox always rages during the winter season when the poor people are deprived of fresh vegetable foods

Celery and onlens are good for this purpose, but there is such a long interval between their being gathered and being enten that they lose most of their antiscorbutic properties. Lettuce is served shortly after it is picked, and hence contains the valuable prop erties which will prevent sma lpox

We say without the least besitation or reserve that lettuce will prevent smallpox It is a the and times bet ter than vaccination. EFFICACY OF THE ONION ipply It Outside and Inside and Care a Cold

The idea of an omon cure may not strike the fancy of the esthetic. How ever the experience of those who have tried it is that it works wonders in re storing a racked system to its norma state again. There are three kinds of loses in the onion cure or three onion cures, as you choose to put it. One is liet of ontons the other is onion plas ters and the third is onlon slup-It is claimed by those who believe is the onion cure that a bad cold can be proken up if the patient will stry in

doors and feed on a liberal diet of onlons It need not be an exclusive dlet, but a liberal one For instance an onion cure breakfast includes ponched egg on toast three tablespoon fuls of filed onions and a cup of coffee Luncheon of sandwiches, made of Bos ton brown bread, buttered and filled with finely chopped thw onions sea soned with sait and pepper makes the second meal on the schedule. For sup per the onions may be fried as for breakfast and eaten with a chop and a

baked potato The strange efficacy of onions is wel known to the singers of Italy and Spain, who cut them every day to im prove the quality of their voices and keep them smooth. Onlon plusters ar prescribed to break up hard coughs They are made of fried onions placed between two pleces of old muslin. The plaster is kept quite hot until the pa tient is snugly in bed when it is placed on the chest to stay overnight sirup is a dose that can be bought or any druggist and is claimed by some t e unequaled as a cure for a cold in the

All this is probably quite true Por to be done up with onions both inside and out would be enough certainly to chase out any self respecting cold-Table Talk

1 Spider and a king On the cultury of me of the rooms in Sans Souc: the world renowned palace of Prederick the Grant in Prussia is the painting of a Ruge spilet with its neb. The reison for this odd decora tion is that the morning just as the king was ab ut to drink his usual morning cup of chocolate in this room he turned iside for something and when a moment later he took up the cup he noticed a small spider had fallen into it Immediately upon giv ing an order for a fresh cup a pistol eport was heard and it was discov ered that the cook had shot himself The reason for this it was later found out was that he had poisoned the chocolate and of course when a fresh

cup was ordered he supposed his treachery had been discovered. It was in remembrance of this narrow escape that Predetick ordered a spiders web to be painted on the ceiling Consoled Widow "Yes said (oyote lim bih aw nake a mistake once stranger but we squared it up all right

Bedford County Fair, October 6, 7, 8 and 9, 1903

THE PROGRAMME FOLLOWS:

1st—A sham battle between the lone Scout and a band of Indians The Scout's pony lies down and is used as a breastwork. The Scout fights and kills the Indians. A fine scene of horsemanship, fighting and general skill.
2nd—Cowboy race, a quarter mile dash which is very exciting.
3rd—Picking up objects from the ground while at full racing speed. Large half-breed horses are used in this act; and it is done with life and vim. Also funny Cowboy and hurro.

and burro.

4th—Roping, or lasso throwing; catching a horse by the neck, catching a rider, catching a horse by the leg while at full speed, throwing the rope thirty or forty feet away, and using the rope in many different styles.

5th—Riding wild and bucking Bronchos; this is truly an exciting scene. Our ponies are very vicious, and are kept in good condition for that purpose. Cowboys' fun on the plains.

on the plains.

6th—Pony Express, showing how despatches were carried across the continent before telegraph was used; quick changes. Also the burlesque with Mexican burros.
7th—Revolver handling, showing many remarkable points in handling the large Navy revolver in time of close quarters and danger. The quickest in the world by Broneho John. Broneho John.

Sth—Showing what is done with a horse thief; capture, dragging and hauging to tree. Sth—All aboard for Deadwood. The Old Overland Coach; four half-breed borses with life and spread, the old-time driver with his four-in-hand—whop goes the whip and they are off—Road Agents command "hold-np," a run for life past the grand stand. Cowboys to the rescue. A running fight and capture.

The most interesting exhibition ever witnessed on any Fair Ground. The chase and hold-up of the Overland Stage will be a feature of intense excitement.

DON'T MISSIT! It's all free on the track each day at the Fair.

SEPTEMBER IS HERE

HE nights are cool and the crisp air delightful. With this first Fall Month business crosses a trade line. To anticipate what people want in Clothing is almost a science. Anybody with money can fill a store with goods; but it takes the right kind of goods to fill it with people. Our stock this season is the best that this store ever had, not alone in quality but in price also. Better goods than we sell aren't made for the money, higher grades of goods can't be got anywhere in this part of the state. Talk is cheap. Other stores make big statements about their goods and low prices, but when you go to buy their goods their tone is different. We give you just what we advertise, and well you know it, if you are a customer of ours. If you are not a customer of ours you will be if you let us prove it to you. We are now beginning this season's business by offering to the trade such bargains that no one else but ourselves can give. So don't be making a mistake and trade elsewhere. Come here and see how big a bargain you can get.

Here are a few Things to Interest You

Besides lots of other goods that we have that you need. School Shoes for Children.

you'll say so too. Our entire stock is so generalized this season that we can supply Men, Women and Children with all their needs in wearing apparel, from head to foot, and if we don't save you at least 25 cents on the dollar you needn't spend a cent with us. Our new Fall line of Ladies' Skirts are all in stock now; come and see them. Come here for your Fall and Winter goods, no difference what it may be that you need, we have it.—Clothing

and shoes for everyone. We are now busy unpacking Ladies' Garments and will tell you all about them in next week's GAZETTE.
